HISTORY OF IRP

- 1985** Super Cooler (the predecessor to IRP) begins production of the original keg cooler in a building constructed on the founder/CEO's home property.
- 1986** Company name changes and becomes incorporated as Iowa Rotocast Plastics, Inc. and moves to new 4,000 sq ft location in Decorah, IA.
- 1994** The Arctic is born and sold to Coca-Cola. Kolor Graphics is created as an in-house printer to fulfill the growing demands.
- 1998** IRP moves to current location in Decorah, IA and constructs 20,000 sq ft production facility.
- 2006** Several additions totaling over 100,000 additional sq ft – fabrication line developed to satisfy increasing demand for fabricated carts and kiosks. A third rotational molding oven is added to the second IRP location - a large capacity oven.
- 2009** IRP adds a 60,000 sq ft second physical location.
- 2012** Grizzly Coolers is launched as the re-branded image of roto-molded coolers manufactured by IRP taking a more B2C-focused position in the market.
- 2016** IRP adds a powder coating line to the second IRP location. A fourth rotational molding oven is added to the main IRP location - a high volume oven.
- 2017** IRP is awarded the US Bank Stadium bid in Minneapolis, MN, launching a series of stadium and venue books of business to follow.
- 2019** IRP introduces an ACM line of fabricated carts for more cost effective construction. IRP is also awarded Wrigley Field and Allianz Field stadium bids.
- 2020** In response to Covid-19, IRP developed a line of hand sanitizers to promote health and safety. Nashville Soccer and Cincinnati Soccer stadiums both award fabrication bids to IRP.
- TODAY** Launched re-branded e-commerce website and constructed new staging area in our fabrication facility. Company restructures to allow for the next generation of family members to take on executive leadership roles.

Iowa Rotocast Plastics, incorporated in 1986, is an established manufacturer and supplier of merchandising equipment for the food and beverage industry. IRP caters to beverage brands and food-service and hospitality groups, as well as working directly with stadiums, venues, and arenas to fulfill year-over-year needs.

The IRP family of brands is divided into three main product categories: RotoTough™ products that include ice-down merchandising solutions and case stackers; wire racks and electronic refrigeration; and IRP's fabricated food & beverage equipment built for on/off premise. IRP equipment meets or exceeds required industry regulations and is NSF and UL approved.

ROTOTOUGH

The IRP RotoTough product line encompasses double-walled rotationally molded plastic products with interior foam insulation. This product line is intended to chill, preserve, and promote your beverage through the use of ice. Hallmark features of this line include extreme durability and longevity...many units in the field are still in use 10-15 years after purchase. If you need a no-fuss portable workhorse with optimal ROI, the RotoTough line is the ideal choice.

FABRICATED CARTS

IRP has significant experience in the design and fabrication of carts and kiosks in professional or collegiate sports venues, stadiums, arenas and resorts. IRP carts and kiosks can be created to your exact specifications, no cart is too big or small. All our carts can be designed with a combination of food & beverage serving options, or as mobile retail or P.O.S. stations.

UNIVERSAL SELLING STATION

3 PIECE DRAFT

If you can dream it, you can build it with the IRP Universal Ultimate Selling Station. Mix and match any option and create any size of selling station needed for your location, on or off premise.

Customizing your Universal System is a quick and easy way to get the most use from your chosen unit. Our large optional canopy provides excellent shade for vendors, as well as shelter from the elements.

CUSTOM ROTATIONAL MOLDING

The Process Made Simple. IRP's custom rotational molding, design and product engineering teams design and manufacture rotomolded, plastic products and parts of all kinds for OEMs and other companies in every industry. With a history of skill and expertise beginning in 1983, we work with companies to develop solutions for converting products from metal, wood, fiberglass and other materials into wholly integrated, rotationally molded plastic designs. We specialize in custom rotomolding projects for commercial and industrial products.

LEADING EDGE ON-SITE PRINTING

Since 1994, our in-house printing facility, Kolor Graphics, has worked with some of the biggest names in the food and beverage industry. With our state-of-the-art printing technology, IRP can fulfill the demands of even the largest companies or brands.

Kolor Graphics can print on a variety of materials, including vinyl, styrene, adhesive, polycarbonate, and more. Carts, kiosks, racks, and merchandisers can all be customized to amplify your brand or maintain design integrity of your venue or facility.

Our team is here to make sure your order is completed to exact specifications in every step of the process.
