ABOUT IRP

Iowa Rotocast Plastics, incorporated in 1986, is an established manufacturer and supplier of merchandising equipment for the food and beverage industry. IRP caters to beverage brands and food service and hospitality groups, as well as working directly with stadiums, venues, and arenas to fulfill year-over-year needs.

The IRP family of brands is divided into three main product categories: RotoTough™ products that include ice-down merchandising solutions and case stackers; wire racks and electronic refrigeration; and IRP's fabricated food & beverage equipment built for on/off premise. IRP equipment meets or exceeds required industry regulations and is NSF and UL approved.

IRP HISTORY OF IRP

- 1985** Super Cooler (the predecessor to IRP) begins production of the original keg cooler in a building constructed on the founder/CEO's home property.
- 1986** Company name changes and becomes incorporated as Iowa Rotocast Plastics, Inc. and moves to new 4,000 sq ft location in Decorah, IA.
- 1998** IRP moves to current location in Decorah, IA and constructs 20,000 sq ft production facility.
- 2006** Several additions totaling over 100,000 additional sq ft – fabrication line developed to satisfy increasing demand for fabricated carts and kiosks. A third rotational molding oven is added to the second IRP location - a large capacity oven.
- 2009** IRP adds a 60,000 sq ft second physical location.
- 2012** Grizzly Coolers is launched as the re-branded image of roto-molded coolers manufactured by IRP taking a more B2C-focused position in the market.
- 2016** IRP adds a powder coating line to the second IRP location. A fourth rotational molding oven is added to the main IRP location - a high volume oven.
- 2017** IRP is awarded the US Bank Stadium bid in Minneapolis, MN, launching a series of stadium and venue books of business to follow.
- TODAY** Launched re-branded e-commerce website and constructed new staging area in our fabrication facility. Company restructures to allow for the next generation of family members to take on executive leadership roles.

CUSTOM FABRICATION

Customizable Kiosks

IRP has significant experience in the design and fabrication of carts and kiosks in professional or collegiate sports venues, convention centers, stadiums, arenas and resorts.

The current IRP manufacturing plant based in Decorah, IA is now over 200,00 square feet, with production running 24 hours a day, five days a week. All elements of design and production are kept in-house, allowing maximum efficiency and quality control. This means all projects ship straight from the facility where they are designed and fabricated.

MOBILE MERCHANDISING

Mobile Carts & Kiosks

Featuring prominent branding, our portable carts are the merchandising solution to bring products to fans on the go. Perfect for merchandising, draft, package or cocktail.

When you work with the IRP custom fabrication division, the entire process is kept in-house and under one roof. Your dedicated account manager takes each project from idea to installation, assuring up-to-date status communication and timely delivery. We work closely with you to ensure brand integrity is not just maintained, but is amplified.

GRAB N' GO PRECISION SERIES

Carts & Enclosures

The IRP Grab n' Go modular kiosk helps streamline the self-serve vending process. Paired with artificial intelligence to enable express self-checkout significantly increases the speed of beverage sales.

Implemented in the 2019 MLB season, an article published by Food & Wine magazine* cited that the units paired with A.I. have "made beer sales up to 40 percent faster, not to mention increased sales up to 25 percent."

All with prominent branding, the Grab n' Go kiosks offer several customizable configurations to fit the needs of any stadium or venue. Featuring refrigeration for beverages and open air units for easy grab food items, hanging baskets for snacks and merchandise, crowd corrals to direct traffic flow, snap frame graphic panels on crowd corrals and header, POS cart, roll-up lockable doors to lock down product at the end of event and are portable with wheels.

NEW ROTOMOLDED PRODUCTS

New IRP Products

We work alongside clients to develop solutions for converting products from metal, wood, fiberglass and other materials into wholly integrated, rotationally molded plastic designs.

Rotational molding is a manufacturing process that relies on gravity and heat to produce parts with exceptional strength. The finished product is a stress-free, lightweight and seamless design that is very durable.

IRP's manufacturing and fabrication plants in Decorah, IA are equipped with state-of-the-art Ferry rotomolding machines, CNC routers, a dedicated foam room, plasma treater, and full assembly line. We have a wood shop and full metal-working shop with 50+ year of experience in our expert staff.
